

New York State Grand Rounds: Preventing Rx Drug Abuse

Monday, September 20, 2010
Albany Medical College, Room MS 169, 9 – 10:30 a.m.*

This presentation reviews the scope of the prescription drug abuse problem and how providers can better influence and educate their patients.

Nearly 1 in 5 teens report abusing prescription drugs to get high

- Are your ADHD patients prepared to deal with other students asking for their drugs as a study aid?
- Is your patient who had his wisdom teeth out or who had a sports injury prepared for kids to ask him to sell his leftover pain relievers?
- Do parents know about these risks?

***How to Participate:**

1. Attend in person at Albany Medical College
2. Participate in live videoconference by calling 1-866-719-1998, passcode: 800285.
3. Or, watch the program later through an archive stream provided by the Adirondack Area Network at http://streaming.aanet.org/ramgen/amc/AMC_PRC092010.smil

Contact Maureen Cary or Robin Lyle at The Prevention Council at 581-1230 for more information.
