

KEEP YOUR EQUIPMENT RUNNING STRONGER, LONGER.

It's almost time to break out the trimmer or brushcutter and begin another season of outdoor tasks. But before you plunge right into the list of projects on your to-do list, take a few minutes to address your machine's basic maintenance needs.*

To help get the most out of your STIHL product:

- ✔ Inspect the spark plug and replace if necessary.
- ✔ Clean or replace the air filter.
- ✔ Check to ensure that all protective devices like the deflector are attached and working.
- ✔ Mix fresh fuel. Do not use last year's fuel mix because gasoline degrades over time. Buying fresh gasoline and using new mix oil will help prevent problems.
- ✔ Replace the trimmer line if necessary. Trimmer line dries out and older line will break easier.

Visit Hudson River Tractor for assistance or for more tips on equipment maintenance.

*Refer to your product's user instruction manual for specific maintenance procedures.

KM 55 R

KombiMotor

Create a custom lawn care system - buy the KombiMotor and the attachments you need
