

SPECIAL SEPTIC SYSTEMS

THE FOLLOWING STATEMENT IS TO BE SIGNED AND STAMPED BY A LICENSED PROFESSIONAL ENGINEER FOR EACH PROJECT FOR WHICH A SPECIAL DESIGN SEPTIC SYSTEM IS BEING PROPOSED.

The undersigned understands and agrees that the installation of the alternative septic system of their design at _____ must be inspected by the design engineer. A copy of the final inspection letter shall be submitted to the Building Department prior to backfilling the referenced system. It is also understood that the Town of Clifton Park Building Department must inspect the system installation. All fill materials are to be stabilized in accordance with the proposed plans and specifications. Percolation tests are to be performed on the stabilized fill material. The results, along with any modifications to the original system design, must be submitted to the Building Department for review and approval prior to system installation.
