LACE LANE AND DENIM DRIVE PAVING UPDATE FROM HIGHWAY SUPERINTENDENT RICK KUKUK

I have just been informed that our contractor can begin work tomorrow (Tuesday, August 24)! Please be sure to **not park** vehicles on roadways overnight. Work may commence as early as 6 A.M.

I would like to offer a recapitulation of our plans and actions on this long awaited project. We had initially planned to install new, improved storm drain structures. However, because the sanitary sewers and natural gas systems had been installed since the original build out of the sub-division we encountered conflicts with those lateral service lines. That caused us to "go back to the drawing board" and re-design the roadways with existing grade elevations.

The roadways will be re-built with the following steps.

1. Milling machine will grind and remove existing pavement layers.
2. Grader and rollers will re-establish proper profile and gradation.
3. New pavement will be installed in two steps, first a course binder and then a top coat driving surface.
4. Driveway approaches will be re-paved to match street level.
5. Highway crews will fill behind new roadway wing curb and establish new grass turf.

Please Note: All new roadways will be 30' in width, including wing gutter. Some stretches are presently 36 feet wide, so some of you may be gaining 2-to-3 feet of additional turf area.

I appreciate your patience in this important matter. I assure you that I and my staff will continually monitor the work until complete satisfaction. Please feel free to call my office at 371-7310 if you have any questions.

Thank you.

A handwritten signature in black ink that reads "RM Kukuk".
