Highway Superintendent Announces Upcoming Road Work

Crack Sealing Operations to take place on Moe, Bruno and Miller Roads

Work to commence Thursday June, 3 contingent upon favorable weather conditions. Contractor crews will begin work at approximately 6 AM and continue through 4 PM each day. Duration of work should be three to four Work days.

This process is part of our revised Pavement Maintenance Program. Hot, liquid asphalt is applied to aging pavement surfaces to prolong pavement life. The contractor's crew will be restricting traffic to one lane, alternating direction. Please obey flagmen to avoid driving on fresh material.

Thank you for your patience.

A handwritten signature in black ink that reads "RM Kukuk".

Rick Kukuk
Highway Superintendent
